INTRODUCTION

DS Water Technology is an International Standard Indian Company which is leading , Supplier, Manufacturer, Importer of an exclusive range of Swimming pool equipments, Accessories, Pool furniture , Fountain accessories, Spa equipments & Chemicals TCCA - 90%(Granular & Tablet), We are also developing products according to Indian requirements.

Our products are manufactured from the best quality raw material and are quality tested before dispatch. The products are manufactured with the product appropriate technology incorporating all the necessary protection features. The products are available with various options of sizes and colors (in some cases) to suit your needs.

The Company is committed to deliver high quality products, improved technology backed with dedicated services and above all our competitiveness ensures complete customer satisfaction.

Filteration Equipments

Top Mount Fiber Glass Bobbin Wound Sand Filter

Features:-

- ✂ The fiberglass winding design enables the filter to be durable, deforming-proof and corrosion resistant.
- ✂ A unique and advanced design ensures fast draining and stabilizes water flow.
- ✂ The 6-position multi-port valve with a user friendly handle easily provides you a maximum flow at low pressure drop.
- ✂ The Sand filter comes with a precise pressure gauge.
- ✂ It is easy to install and to maintain.
- ✂ The Outlet turbidity is less than 2FTU.
- ✂ Working pressure is 2.5 Kg cm²/36 psi.
- ✂ UV resistance surface allows the filter to work under direct sunlight.
- ✂ Maximum operating temperature is 43°C.

Filters & Pumps

Cartridge Filters

Features:-

- Single locking knob securely fastens head to filter tank, eliminating bolts.
- Attractive, durable filter head can be rotated to conveniently position pressure gauge and manual air relief.
- Injection-moulded filter tank for dependable, corrosion-free performance.
- Elevated, filtered water collector & debris sump prevents accidental by-pass of heavy debris to pool or spa when cartridge is removed for cleaning, Working pressure 2.5 kg/cm square/36 psi.
- Cartridge element can be reused after cleaning.
- Outer cover made of reinforced plastic & cartridge element is made of working polyester material

Halbert Wall-Mounted : Integrative Pool Filter

Features:-

Halbert brings the world's most advanced swimming pool filtration system - Halbert Integrative Pipe Less Filter. The Filter integrates the multiple functions of filtration, Disinfection Vacuum cleaning, Illumination and Whirlpool Massage. The filter eliminates the requirement of balancing tank, buried pipes, plumbing and pump room. The Halbert Pipe less Filter can fit any existing water body, swimming pool or pond easily.

The enclosure is made up of high quality Lucrite Acrylic which is known for its properties of acid and ageing resistance.

The filter body is tough and strong. The filter is easy to clean and install.

Inlet & Outlet point Massage Jet Nozzle Led Light, Stainless steel Handrail.

Whirlpool Pump-Application: Pools/Jacuzzi/SPA

Materials:

- Self Priming pump
- Injected thermo plastic pump casing
- Stainless steel studs
- Motor shaft in stainless steel AISI/420
- Impeller in PPO
- Mechanical seal in graphite and ceramic
- Motor housing in aluminum
- Available in 0.5HP, 0.75HP, 1HP, 1.5HP, 2HP, 3HP

Motors:

- Built in pneumatic switch for on & off underwater
- Asynchronous, two poles
- IP 55 protection
- Class F insulation

Halbert Pool Glass Filter Media is the environmentally friendly filter media and a viable alternative to sand; made from glass recycled in the Japan, it doesn't involve intrusive mining and the use of scarce resources.

This media is more efficient. It can remove up to 30% more material and pollutants than, so saving on backwashing and the resultant water, energy and chemical treatment costs.

This media is suitable for both commercial and residential filters with laterals or nozzle plates.

The single media filtration by use of filter sand is widely spread as a general filtering method. However in these days the treated water quality standards are tightened in addition to the deterioration problem of raw water quality arisen from the growth of algae and cryptosporidium, the part of filtration, which is a key point of water purification become more important and performance is required.

Pre-filtration to protect membrane process from fouling.

Filtration of cooling water to prevent heat exchanger fouling.

Pressure filters uses granular media to remove contaminants from water.

Swimming Pool Pumps

Swimming Pool Pumps

HQ Series

HSP Series

HPC-Series

Applications:

Jet pumps for bath tubs, spa pools, Swimming pools, massage stations and Cleaning Systems.

Features:

1. Wet ends made of high reinforced engineering thermal plastic with compact structure and corrosive-resistance.
2. 1.5 inch Inlet and outlet.
3. High efficient structure design for diffusor and impeller to get higher performance.
4. No contact between motor shaft and liquid.
5. Motor / Pump shaft has no contact with the water.
6. Continuous Operations

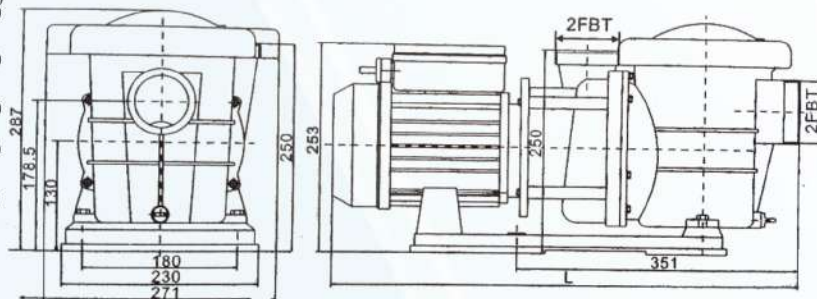

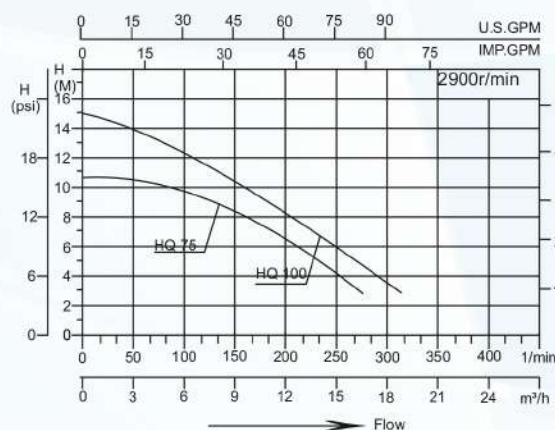

Motor:

2-pole induction motor Single-phase : 220-240/50Hz Single-phase with thermal protector

- a. Capacitor inset
- b. Insulation class F
- c. Protection IPX5
- d. Continuous duty

Swimming Pool Pumps

Applications:

Jet pumps for bath tubs, spa pools, Swimming pools, massage stations and Cleaning Systems.

Features:

1. Motor / Pump shaft has no contact with the water.
2. Total electrical separation.
3. 2.2L pre filter.
4. 2" inlet & outlet.
5. Motor / Pump shaft has no contact with the water.

Operative Conditions :

1. Liquid temperature from $+5^{\circ}\text{C} \sim +60^{\circ}\text{C}$
2. Ambient temperature up to 50°C
3. Max. working pressure : 3 bar

Motor:

1. 2-pole induction motor Single-phase : 220-240/50Hz Single-phase with thermal protector T.I.

- Reduce cleaning time by keeping dirt and other debris out of the pool.
- You can significantly reduce swimming pool heating costs by using a pool cover

Specification:-

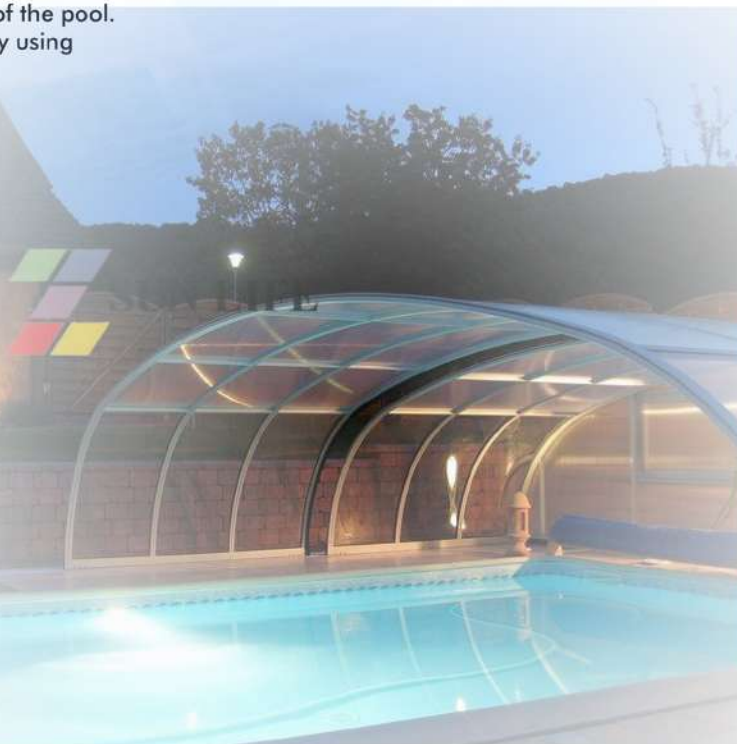

- Material LDPE
- Bubble diameter 8- 12 mm
- Thickness 400 – 600 micron
- Available in every shape and size
- UV and Chemical resistant
- Strong and heavy duty border
- Heat welded to any shape and size
- Durable and water proof
- Save Water chemical and valuable time
- Long life
- Easy Installation

Pool Cover Reel /Pool Cover Roller

Swimming Pool Cover Reel make it an easy operation if you install a Reel(Pool Cover Roller) for your pool cover

Technical Specifications

- Stainless steel stands and tube grade 304
- Well Polished
- Heavy duty tubing
- Bearings per side insure smooth operation
- Every sizes are available as per customer choice
- Superior control of pool Cover handling procedure

The health benefits of hydrotherapy, as has been proven internationally over decades are unsurpassed. Sportsmen can identify, the need for rapid recovery and hydrotherapy accelerates healing of injuries and hard exercise tissues. Long-term bed patients with circulatory problems benefits most through stimulating the body cells. Lymphatic fluid reaches the cells more quickly which means that minerals and vitamins from food reaches the destination sooner. The removal of waste products and toxins is accelerated.

There is another side to hydrotherapy which cannot be evaluated scientifically and that concerns the effort on the mind. The care of the day and tensions float away leaving the wonderful feeling of wellbeing. The luxurious swirling, warm water holds you captive, helps build relationships, encourages togetherness and forces you to relax.

Domestic Heat Pump

- Patented high-performance titanium exchanger has more stable performance and greatly resist erosion of chlorine ion water, solid and durable.
- Exterior is anti-UV plastic ABS corrosion resistant casing material with injection model or normal plastic model.
- By using high-heat exchanger technology, 65-80% of running cost can be saved compared with other heating machines. It consumes 1kw to produce about 5.5kw heating capacity, possessing high COP.
- Heating and cooling with reversible defrosting.
- Remote and intelligent controller design with Celsius of fahrenheit temperature display for options.
- LCD or colorful LED controller for options
- Super power failure memory.
- Flow switch built-in to avoid the low level water or devoid of water.
- Advanced technology to mute noise from compressors and fans.

Pool Heating System - Online Heater

Fully equipped
Easy Installation
Robust, durable construction
Analogue control with 1C Differential
Incoloy 825 or Titanium heating elements
316 Stainless Steel or Titanium flow tube
Ultra-reliable flow switch allows safe operation as low as 1,000 ltr/h
May be floor or wall mounted using swivel foot
Control thermostat and safety thermal cut out (manual reset)
3 years conditional warranty

Heating & Ozone Generator

Pool Heating System

The Halbert Spa Heaters are intended for use small pools, jacuzzi and spa system. It will maintained the water at any relaxing and an enjoyable temperature.

Features:-

1. Digital Control Panel.
2. Powder Coated/ Stainless Steel Cabinet.
3. Ip36 Water Proofing, 3 Phase.
4. User Friendly.
5. Easy Installation.
6. Easy Servicing.
7. Suitable for small pools jacuzzi and spas.
8. Shut down automatically.
9. Can be set at desired temperature.

Uses:

for chlorination in tablet form.

Halbert-Inline Chemical Dispenser/Chlorine Feeder

Features:-

- No Special venting required
- Completely enclosed-no escaping gases.
- Positive external no-clog control valve.
- Feeder is designed to automatically lower the water level so tablets are not soaking during off period of pump. This allows more efficient use of tablets.
- Size Available: 4.5LB- 2kgs / 9LB - 4kgs.

Water Treatment

Sewage Treatment Plant

Sewage is nothing but the wastes generated from residential, institutional, commercial and industrial establishments. STP plants treat the sewage to make it fit for safe disposal, agricultural use or domestic use in toilets etc. Sewage usually contains a high quantity of organic and inorganic wastes. It is essential to treat sewage before its entry into any water body. If sewage, is allowed to enter the water sources without treatment, it will contaminate them; which is why it is essential to treat sewage properly before letting it into rivers or any other sources of water.

Water Treatment Plant

We consider wastewater treatment as a water use because it is so interconnected with the other uses of water. Much of the water used by homes, industries, and businesses must be treated before it is released back to the environment.

If the term "wastewater treatment" is confusing to you, you might think of it as "sewage treatment." Nature has an amazing ability to cope with small amounts of water wastes and pollution, but it would be overwhelmed if we didn't treat the billions of gallons of wastewater and sewage produced every day before releasing it back to the environment. Treatment plants reduce pollutants in wastewater to a level nature can handle.

Wastewater is used water. It includes substances such as human waste, food scraps, oils, soaps and chemicals. In homes, this includes water from sinks, showers, bathtubs, toilets, washing machines and dishwashers. Businesses and industries also contribute their share of used water that must be cleaned.

Wastewater also includes storm runoff. Although some people assume that the rain that runs down the street during a storm is fairly clean, it isn't. Harmful substances that wash off roads, parking lots, and rooftops can harm our rivers and lakes.

Effluent Treatment Plant

Effluent is generated in many manufacturing industries like textile, pharma and chemicals, tanneries etc. Contaminated water cannot be released without treatment as it contains toxic and nontoxic chemicals. Releasing it may cause contamination of the existing pure water and affect the environment. As a result ETP's are installed in most manufacturing industries.

The Effluent treatment plants (ETP) are used for the removal of high amounts of organic compounds, debris, dirt, grit, pollution, toxic, non-toxic materials, polymers etc. from industrial effluent. The ETP plants use evaporation and drying methods, and other auxiliary techniques such as centrifuging, filtration, incineration for chemical processing and effluent treatment.

Competition Pool Equipment

Halbert - Anti Wave Racing Lanes

Our latest model racing lanes represent the cutting edge of lane design and efficient wave dissipation. Anti wave racing lanes comply with all FINA, LEN and relevant regulations. These lanes are used to delineate the swimming lanes in pools. For competition and training for competition. Lane diameter is 110mm and 150mm available in different color options - Red, Blue, Yellow, Green and White. Prepared with CP+PP raw material. Lane Cable is SS316, 304 with diameter of 3.1mm to 6mm.
